

# Santa Monica Residential **GREEN BUILDING GUIDE**

Healthy Home. Healthy Planet.

## Homeowners: THINGS TO CONSIDER

The following describes the green building objectives for each given building stage or element of a new home. The objectives should be kept in mind as guiding principles when making design decisions and selecting materials and equipment. Below the objectives are some common materials and measures that can contribute to a greener home. The list is not comprehensive, but highlights some of the more commonly or easily achieved measures. For a more complete idea of measures that can make your home healthier and more environmentally sound, refer to the **Builder: Detailed Measures** section, the Additional Resources at the end of this guide or visit the Green Building Resource Center at 2218 Main Street, Santa Monica, [www.globalgreen.org/gbrc](http://www.globalgreen.org/gbrc)
